

## Humans and psychology

Colour in the list as you work through the module. Remember:

RED – do not understand, ORANGE – Not to sure , GREEN – Fully understand

|   |  |
|---|--|
| I can identify the main organs/structures and their functions listed below:<br>males: penis, testes, sperm duct (vas deferens), seminal gland females: ovaries, oviduct (fallopian tube), uterus (womb), cervix, vagina |  |
| I can identify the organ responsible for the transfer of the things necessary for the growth and development of the foetus as the placenta.   |  |
| I can discuss the role of the parent.   |  |
| I can label a simple diagram of the human digestive system.   |  |
| I know what happens to food in the different parts of the digestive system, e.g. mouth, stomach, small and large intestine.   |  |
| I can name the constituents of blood.   |  |
| I can name the constituents of blood. I can label a drawing of the lungs and air passages.  |  |
| I can label a simple drawing of the heart.  |  |
| I know that blood is the main transport system in the body.   |  |
| I know that oxygen is carried by the haemoglobin in red blood cells.  |  |
| I can describe what happens if the body does not get enough oxygen.   |  |
| I know that different parts of the brain control different parts of us.   |  |
| I know the processes that control our reaction rates.   |  |
| I know some of the effects of brain damage.   |  |
