

Space

Colour in the list as you work through the module. Remember:

RED – do not understand, ORANGE – Not to sure , GREEN – Fully understand

I can use terms including Solar System, planet, moon, Full Moon, New Moon, eclipse, atmosphere, orbit, spin, seasons, tilt.	
I can describe the orbit of the Moon around the Earth.	
I can describe the annual orbit of the Earth around the Sun.	
I can describe the daily spin of the Earth around its own axis.	
I can compare conditions on different planets, including year length, day length and seasons.	
I can research information on a chosen planet or moon.	
I understand the phases of the Moon.	
I know the relative positions of the planets.	
I understand that the Sun is a star.	
I can explain the relationship between planetary tilt and seasons, including variation in daylight length.
